DETAILED ACTION

Allowable Subject Matter

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:
 - a. With respect to claim 1, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a printing apparatus comprising a linkage assembly interconnecting a cover assembly and a nip release mechanism for operating said nip mechanism by moving said cover assembly between open and closed positions in combination with the remaining limitations of the claim.
 - b. With respect to claim 13, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a fuser nip release mechanism for a printing apparatus having a linkage assembly connecting said actuating means and the cover assembly for moving said actuating means in response to opening and closing the cover assembly in combination with the remaining limitations of the claim.
 - c. With respect to claim 18, the claim has been found allowable over the prior art of record because the prior art of record fails to teach or fairly suggest a nip release mechanism for a printing apparatus having a follower in the fuser module engageable with said movable component, said follower being moved by movement of said movable component in combination with the remaining limitations of the claim.
 - d. With respect to claims 2-12, 14-17 and 19-20, the claims have been allowed due to their dependency on claims 1, 13 and 18 above.
